Company Focus

Catskill was established as a Michigan corporation in 1996 to specifically provide environmental construction services to industrial, commercial and governmental clients.

Catskill exclusively provides contracting services so that a focused approach to all projects can efficiently and cost-effectively be provided.

Catskill specializes in landfill services, soil & groundwater remediation system construction and environmental clean-up projects involving a variety of contaminants.

Health & Safety

Catskill considers Health & Safety as a core business value. This emphasis has resulted in a record of no lost time incidents in over 8 years. Our EMR is consistently below 1.
